

CODE OF PRACTICE FOR TEMPORARY TRAFFIC MANAGEMENT (CoPTTM) – Technical Note Level 2/3 Sign Stand Bases

Introduction

Following testing four sign bases have been approved for use with signs of Level 2 and 3 roads dimensions.

Two of the signs have been approved subject to use with limitations.

A register of approved signs and a note on any limitations is attached.

Implementation

Existing non conforming bases are to be phased out as follows:

- Rigid bases known as crows-feet or similar are to be removed from all worksites by 30 June 2010.
- Non compliant flexible bases are to be removed from all worksites by 31 December 2010

Future Approvals

New sign stand base approvals will be added as they pass testing. Testing is to be undertaken at own expense. Testing is carried out by OPUS Central Laboratories. For details of testing or to have a sign stand base tested apply to:

4.	Urban No. 2		<i>May only be used with Limitations</i>	

MANDATORY ADDITIONAL REQUIREMENTS FOR RTL SPIDER AND URBAN BASES

The spider and Urban stands are only compliant when used with the following:

1. The legs with the yellow directional arrow stickers must face the direction of traffic.
2. Legs should be set at 80° to 100°.
3. Sandbags must be firmly packed polyethylene bags placed near the hub or centre of the stand as shown in the attached photograph

Failure to comply will render the stand non-compliant
